

PRE-CONFERENCE WORKSHOP-IIA

Visualization of Construction Planning Process

ISARC
2023

Sustainable Construction with Automation

Learning Objective:

- To learn to use simulation and visualization technologies for planning construction operations.
- Participants will be taught to create 3D visualizations of the construction process and quantify performance metrics and resource utilization.

Details:

- No prior knowledge/skill is required, and a simple scripting language will be taught during the workshop.

Convenor:

Joseph Louis, Ph.D.

Assistant Professor,
School of Civil and Construction Engineering
Oregon State University, Corvallis, OR, USA
